

Pedro Henrique Miranda de Oliveira

Java backend and full-stack engineer with 4 years of experience building and modernizing enterprise applications in automotive, industrial, and technology environments. Experienced with Java, Spring Boot, Quarkus, REST APIs, microservices, and event-driven integrations using Kafka and RabbitMQ. Brings hands-on experience with legacy modernization, refactoring, production troubleshooting, cloud-native delivery, automated testing, and code reviews. Works effectively in international teams in English and pairs backend depth with TypeScript and Vue.js frontend delivery.

WORK EXPERIENCE

BMW Group TechWorks Brazil powered by act digital

Mar. 2026 - Present

Java Full Stack Developer

Sao Paulo, Brazil

Developing and evolving backend services for an international automotive program, with emphasis on scalable, maintainable, and resilient distributed systems.

- Develop Java backend microservices with Quarkus and Spring Boot, applying RESTful design and cloud-native patterns for scalable services.
- Refactor and improve services using Clean Architecture, Domain-Driven Design, and SOLID principles to strengthen maintainability and engineering quality.
- Investigate performance and production issues in distributed environments; contribute automated tests, integrations, code reviews, and technical improvements.
- Refactored a critical endpoint, cutting response time from 26 seconds to 500 ms (approximately 98%) and eliminating unnecessary downstream requests.

Tech Stack: Java, Kotlin, Quarkus, Spring Boot, Vue.js, Azure, AWS, Docker, Kubernetes, CI/CD, Microservices

Inmetrics

Jan. 2026 - Mar. 2026

Mid-Level Software Engineer

Sao Paulo, Brazil

Modernized enterprise services with a focus on performance, scalability, and asynchronous integration patterns.

- Applied Clean Architecture, Hexagonal Architecture, DDD, and TDD while evolving Java services and existing codebases.
- Developed high-performance APIs for high-concurrency workloads and asynchronous messaging flows.

Tech Stack: Java, Quarkus, Spring, MySQL, PostgreSQL, RabbitMQ, Kafka, AWS, Docker, Kubernetes

Metadil

Feb. 2024 - Jan. 2026

Mid-Level Full-Stack Developer

Guarulhos, Brazil

Led the restructuring and evolution of critical business applications, including a sales CRM, production scheduling solution, factory portal, and internal ERP.

- Modernized legacy systems for performance and scalability using Clean Architecture, DDD, TDD, and RabbitMQ-based integrations.
- Developed APIs supporting hundreds of concurrent users and high transaction volumes across operational systems.
- Integrated applications with TOTVS Protheus to synchronize sales, support, administrative, and factory data.
- Facilitated technical discussions with management and performed code reviews to promote quality and engineering best practices.

Tech Stack: TypeScript, NestJS, Express, Vue 3, Next.js, PHP, Laravel, Go, MySQL, PostgreSQL, RabbitMQ, AWS, Docker, Protheus

SQAD Technology

Sep. 2022 - Feb. 2024

Backend Developer

Sao Paulo, Brazil

Developed features across multiple projects and maintained legacy applications, contributing to technical analysis and code reviews.

- Built backend services with Python frameworks while applying Clean Code, TDD, and SOLID practices.

Tech Stack: Python, Flask, Django, Django REST Framework, Pytest

Freelance Developer
Backend Developer

Various Dates
Brazil

- Delivered web applications including a student ID card generation system, a booking platform, and FoodHelp, an industrial-kitchen maintenance platform.

Tech Stack: Java, Spring, Node.js, NestJS, Express, TypeScript, Prisma, Vitest

EDUCATION

FIAP
Postgraduate Certificate in Software Architecture - Expected Jun. 2027

Aug. 2026 - Jun. 2027

Estacio
Associate Degree in Systems Analysis and Development

Jan. 2023 - Jul. 2025

ENIAC
High School with Technical Degree in IT

Jan. 2020 - Dec. 2023

CERTIFICATIONS, SKILLS & LANGUAGES

Certifications: Apache Kafka Fundamentals - Confluent; AWS Partner Technical Accredited Training Badge; Docker - Full Cycle; Domain-Driven Design and Clean Architecture - Full Cycle

Backend and APIs: Java, Spring Boot, Quarkus, Python, Django REST Framework, Flask, REST APIs, JavaScript, TypeScript, Node.js, NestJS, Express

Data and Messaging: PostgreSQL, MySQL, Oracle, SQL Server, DynamoDB, Apache Kafka, RabbitMQ

Cloud and Delivery: AWS (S3, Lambda, EC2, SQS, ECS, EKS, SNS, CloudWatch), Azure, Docker, Kubernetes, CI/CD

Architecture and Quality: Microservices, Event-Driven Architecture, DDD, Clean Architecture, Hexagonal Architecture, SOLID, TDD, code review, legacy modernization

Languages: Portuguese (native), English (advanced professional working proficiency)
